ProcessPro Offers Incredible Year-End Promotions

St. Cloud, Minn., November 6, 2008 -- ProcessPro, developers of ProcessPro[®] Premier software, announces the launching of two very generous and rewarding bonus promotions. Any company that purchases a new software system before the end of the year will receive interest free financing until the year 2011, or valuable product discounts of up to \$20,000 on a 20-user system. Companies will be able to select which promotion is right for them!

"Providing interest free financing for three years will help remove a major decision roadblock that we see many organizations facing," says Ward Blaschko, CEO of ProcessPro. "In the alternative, the steep discounts we are offering makes the product ROI much stronger for companies that have 20 or more users."

ProcessPro[®] Premier software is a robust ERP solution for process manufacturers. It's a perfect fit for manufacturers that make batches of formulas, track lot numbers, perform Quality Control tests, quarantine inventory, print bills of lading, and more.

ProcessPro[®] Premier has helped manufacturers reduce labor costs, reduce inventory carrying costs, reduce production errors, improve customer satisfaction, and increase sales revenue.

"With this promotion, we hope to reach out to those manufacturers that have all of the above goals and requirements, but don't have the extensive budgets that are often required by other ERP software vendors," states Scott Fujan, ProcessPro VP of Sales and Marketing.

This offer given by ProcessPro does expire. Contracts must be signed by December 19, 2008. Therefore, companies that are considering purchasing a new ERP software within the next 12 months will want to take advantage of this unique opportunity.

For more information about ProcessPro[®] ERP software, or to schedule a free demonstration, call 1-800-457-3548 or visit: <http://www.ProcessProMFG.com>.

###

ProcessPro[®] software is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro[®] software seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro[®] software is available with full source code and is sold and supported directly by ProcessPro.
