Atlanta Cheesecake Company Starts the New Year with ProcessPro[®] Premier ERP

St. Cloud, Minn., January 20, 2012 – Atlanta Cheesecake Company selected ProcessPro[®] Premier ERP software. Atlanta Cheesecake Company started in 1988 with a few delicious home-made cheesecakes and has grown to offer hundreds of different cheesecake varieties. In addition to cheesecakes, the company offers other desserts, coffee, tea, and sandwiches.

With support running out for Atlanta Cheesecake's legacy system, they took the opportunity to explore ProcessPro[®] Premier ERP software. Atlanta Cheesecake needed advanced reporting features such as those available in ProcessPro[®] Business Intelligence Suite.

"Quality control was also key in their search for ERP software," says Aaron Gindele, ProcessPro Business Development Representative, "along with the ability to meet SQF standards and FDA compliance regulations."

Atlanta Cheesecake's other needs included the ability to easily toggle between different units of measurement and to be able to access various areas of the database system simultaneously by a single user.

"Atlanta Cheesecake was also looking for a strong support network behind the system. They made the point that they want to run their business without needing to be experts in software," continues Gindele.

With ProcessPro, Atlanta Cheesecake Company doesn't need to worry about being experts in software. ProcessPro proposed a sound implementation strategy and is user-friendly. ProcessPro quickly became the clear choice in ERP software for Atlanta Cheesecake Company.

ProcessPro[®] Premier is a fully integrated, real time ERP that offers a complete system from beginning sales order entry through the manufacturing and accounting process. ProcessPro[®] software is the leading ERP solution among food manufacturers because of its FDA compliance features including security audit trails, electronic signatures, and validation services. Any company that must adhere to FDA and cGMP regulations will be able to maintain compliance regularly as well as be prepared for a product recall.

For more information about ProcessPro[®] Premier and how it can meet your specific process manufacturing needs, visit www.ProcessProERP.com.

###

ProcessPro[®] Premier is the leading mid-market ERP software solution for the process manufacturing industry.
