### ProcessPro Releases Business Intelligence Suite

St. Cloud, Minn., October 21, 2011 -- ProcessPro, developers of ProcessPro<sup>®</sup> *Premier* ERP software, is excited to announce the release of its new business intelligence application. ProcessPro<sup>®</sup> Business Intelligence Suite provides easy access to data resulting in the ability of managers and senior executives to make better informed business decisions in real-time.

ProcessPro<sup>®</sup> Business Intelligence Suite creates a platform for complete business analysis through interactive graphs, charts, and reports that are easy to compile and understand. It is fully integrated with ProcessPro<sup>®</sup> *Premier* seamlessly pulling data from the entire system as well as third party databases. Real-time reports can be created within minutes.

“Instant reporting is critical in managing today’s dynamic business environments,” says Joe Blauert, ProcessPro President. “The ability to interactively drill down into multiple deeper levels of report data gives managers instant access to the root of business problems.”

Regular reporting is also important for maintaining business decision competencies. ProcessPro<sup>®</sup> Business Intelligence Suite can also be set to automatically run and distribute standard reports on pre-determined schedules. Reports can be published in html, pdf, or spreadsheet format, then automatically emailed to team members or directed to the intranet.

“The dashboard within Business Intelligence Suite provides flexibility and usability for every user - even those with less technical capabilities,” says Shanon Odegaard, ProcessPro Product Manager.

ProcessPro<sup>®</sup> *Premier* ERP is a fully integrated, real time ERP for the process manufacturing industry that offers a complete system from beginning sales order entry through the manufacturing and accounting process.

For more information about ProcessPro<sup>®</sup> *Premier* and how it can meet your specific process manufacturing requirements, visit [www.ProcessProERP.com](http://www.ProcessProERP.com).

###

ProcessPro<sup>®</sup> *Premier* is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro<sup>®</sup> *Premier* seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro<sup>®</sup> *Premier* is sold and supported directly by ProcessPro. Visit ProcessPro’s web site at [www.ProcessProERP.com](http://www.ProcessProERP.com) or call 800/457-3548 for more information.
