Barhyte Specialty Foods Upgrades Software

Confident with Compliance Using ProcessPro[®] Premier ERP software

St. Cloud, Minn., January 15, 2010 -- Barhyte Specialty Foods of Pendelton, Oregon recently completed implementation of ProcessPro's latest Enterprise Resource Planning (ERP) software: *Premier 10*. As a manufacturer of a wide array of sauces, marinades, mustards, and other gourmet condiments, Barhyte takes the responsibility of FDA compliance seriously.

"Maintaining compliance is absolutely critical to our business' success," says Chris Barhyte, Vice President of Sales, Barhyte Specialty Foods. "Partnering with ProcessPro not only gives us the compliance tools in an ERP system, but also industry expert staff to keep us informed of regulation updates."

Barhyte's confidence in their compliance comes largely from the tools in their ERP system, ProcessPro[®] *Premier*. *Premier* is a fully integrated, real time ERP that offers a complete system from beginning sales order entry through the manufacturing and accounting process.

Focused on the regulatory needs of the food and beverage industry, system tools such as the Bill of Material Product Tracking Log provides a complete audit trail for formula creation, modification, deletion, and activation status. Additionally, the system tracks all incoming raw materials and outgoing finished goods including: time stamps, operator entry, and more.

"Barhyte has done their due diligence in the way of compliance," says Shanon Odegaard, Quality Systems Manager of ProcessPro. "They are completely ready for a mock recall or FDA controlled recall. With Premier's cradle-to-grave lot traceability, the system can locate records with all the FDA required information within minutes."

For more information about ProcessPro[®] *Premier* and how it can meet your specific process manufacturing needs, visit www.ProcessProERP.com

###

ProcessPro[®] *Premier* is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro[®] *Premier* seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting.
