### ProcessPro software Names Joe Blauert as President

---

St. Cloud, Minn., April 28, 2009 -- ProcessPro software, a St. Cloud based provider of ERP software targeted at mid-market process manufacturers, announces that Joe Blauert has been appointed the company's President. He will report directly to company founder and CEO Ward Blaschko and lead the day-to-day operations of the organization.

Mr. Blauert brings to ProcessPro over 20 years of experience in the software industry. His most recent experience was in the position of Chief Operating Officer at HighJump Software, a provider of supply chain management software and services, where he led global sales and operations.

"Joe's extensive experience and background in building high growth software organizations will help ProcessPro in its next phase of growth," said Blaschko. ProcessPro has developed excellent ERP software solutions for the batch process manufacturing industry, especially those in highly-regulated environments. The company is poised for accelerating growth, and Joe's experience will help us achieve that growth and scale the organization for the future."

Prior to his role as COO at HighJump, Mr. Blauert filled a number of critical roles in the business including sales management, general management, and Chief Financial Officer. Additionally, Mr. Blauert played a significant role in growing the company from \$10 million to \$90 million in revenue, building a global business, and ultimately selling the company. Prior to HighJump, Mr. Blauert held a variety of sales, sales management, and financial roles at ADP, Inc. and Honeywell, Inc.

"I am very excited to be a part of taking ProcessPro to the next level," comments Blauert. "They are already a leader in the mid-market process manufacturing space, with an exceptional product. The software's ability to meet the needs of FDA and other highly-regulated manufacturers, along with a very solid staff, positions them extremely well for growth."

#### About ProcessPro® software

ProcessPro® software is proud to be the leading ERP software for the highly regulated process industry. Excelling in the small to mid-sized market, ProcessPro® software provides an affordable solution to those who must adhere to strict QC and government regulations including FDA, cGMP, 21CFR Part11, Bioterrorism, HAACP, and more.

ProcessPro® software seamlessly integrates all aspects of plant operations, from beginning order entry through manufacturing, packaging, shipping, and accounting. This fully-integrated, real-time solution rises above other industry software in production capabilities, financial integration, user interface, system functionality, flexibility and more. ProcessPro® software is available with full source code and can be customized to fit your organization's unique business needs.
