ERP Software Provides cGMP Solution for Creation's Garden

St. Cloud, Minn., February 28, 2007 -- Creation's Garden Natural Products, a rising manufacturer of organic dietary supplements and cosmeceuticals, recently selected ProcessPro[®] software as their ERP solution.

"Because of our inherently strict quality principles and OTC/cGMP compliance from our growing customer base, ProcessPro software was the best choice to administrate these tasks," states Dino Guglielmelli, President of Creation's Garden. "We can now channel the process of our products from development, purchasing, manufacturing, inventory control, shipping, accounting, and sales and marketing through quality control and conformance seamlessly and efficiently."

As with any FDA regulated product, lot tracking is essential in maintaining security regulations. ProcessPro's Inventory Control module automatically tracks serial numbers and lot numbers, quarantines ingredients and finished goods for Quality Control testing, and updates inventory balances in real-time.

"ProcessPro knows the Nutraceutical industry," comments William Jones, ProcessPro National Sales Consultant based in Southern California. "Not only does the product provide the tools necessary to meet industry requirements, but our people are experts in the field of implementing ERP systems in organizations that must report to the FDA."

In addition to cGMP, ProcessPro will provide Creation's Garden the most comprehensive foundation for complying with FDA guidelines including a Validation Toolkit, Product Tracking, Revision Control, Audit Trails, and much more.

ProcessPro software is a robust ERP system with full manufacturing and financial integration, offering a complete system from beginning sales order entry through the manufacturing and accounting process with security features ensuring FDA compliance.

Creation's Garden is a licensed GMP company located in Valencia, California with over 80,000 square feet of manufacturing, laboratory, fulfillment, and storage facilities. Creation's Garden needed a reliable software system for standardizing their business practices and integrating operations.

For more information about ProcessPro software, or to schedule a free demonstration, call 1-800-457-3548, email info@processpromfg.com, or visit <http://www.ProcessProMFG.com>.
