Celmark Hydroceuticals Decides ProcessPro[®] ERP is Right for its Business

St. Cloud, Minn., March 13, 2009 -- Celmark Hydroceuticals, a world class manufacturer of liquid multivitamins and minerals, extracts, creams, lotions, and gels, recently selected ProcessPro[®] software as their ERP solution. Celmark Hydroceuticals offers a full-range of custom manufacturing services to meet all their customers needs. It's a team that always remains on the cutting edge of new technologies.

"The ERP selection team had very specific functionality requirements necessary in an ERP. ProcessPro[®] software was the ERP that could meet their needs for the type of custom manufacturing they do and the strict quality control standards they have," reports Tim Sands, Inside Sales Representative, ProcessPro.

Celmark Hydroceuticals puts heavy emphasis on quality control at all stages of the manufacturing process including: Incoming Chemical Analytical Testing, Incoming Chemical Bacteriological Testing, Batch Bacteriological Testing, Production Line Sampling, and After-fill Bacteriological Testing, and much more. In addition, they are "A" rated for GMP compliance by the National Nutritional Foods Association (NNFA).

Celmark Hydroceuticals is also a progressive research and development company, developing over 750 new products every year. The development process is quite complex, involving the formulation of cross functional design teams.

"A well-designed formula is just the beginning of a successful product," states Tom Muller, President of Celmark Hydroceuticals. "Equally important are the use of highest quality ingredients and cutting edge technologies, in this case, ProcessPro[®] software."

ProcessPro[®] software is precisely the tool Celmark Hydroceuticals needs to facilitate its advanced research and development designs. ProcessPro[®] software's Research and Development application allows Celmark to explore new formulas without ever having to shut down current production. In addition, Celmark can merge new formulas into the current production process without complicated merging steps.

ProcessPro[®] software is the leading ERP solution among pharmaceutical and cosmetic manufacturers. ProcessPro[®] software seamlessly integrates Order Entry, Inventory Control, Purchase Orders, Accounts Payable, Accounts Receivable, General Ledger, and more!

For more information about ProcessPro and the manufacturers who use ProcessPro[®] ERP software, or to schedule a free no-obligation demonstration, call 1-800-457-3548 or visit www.ProcessProERP.com

###

ProcessPro[®] software is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro[®] software seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro[®] software is available with full source code, and is sold and supported directly by ProcessPro.
