4th Annual *Client Connect* for ProcessPro

St. Cloud, Minn., September 21, 2007 -- ProcessPro, developers of ProcessPro *Premier* software, recently hosted its 4th annual user conference, Client Connect. Client Connect offers users of ProcessPro software the opportunity to see the latest developments in the software, the ability to network with other clients and ProcessPro partners, and a chance to share industry knowledge.

This 3-day conference held at St. Cloud's Holiday Inn conference center, featured training in basic and advanced accounting, basic and advanced manufacturing, Automated Warehouse Solution, Ecommerce solutions, and much more.

"The goal of our conference is to teach our clients as much as we can about the functionality of our software," declared Molly Caron, ProcessPro General Manager. "By maximizing the use of their software, our clients can reach their greatest potential in production and the greatest return on their investment."

Catering to the mid-sized process manufacturing market segment that has the strictest controls, the ERP solution provides the necessary tools for Quality Control, Material Safety Data Sheets (MSDS), automatic updated Inventory Control in real time, advanced General Ledger and financial management, reporting, and many more features.

"At Kettle Cuisine, we look to ProcessPro for leadership in keeping abreast on industry regulations and providing us with the tools necessary to comply and remain competitive," says Tony Fusco, IT Manager. "This conference really solidified our confidence in ProcessPro."

For more information about ProcessPro software, or to schedule a free demonstration, call 1-800-457-3548 or visit: <http://www.ProcessProMFG.com>

###

ProcessPro[®] software specializes in the implementation of ERP software solutions for the process/batch manufacturing industry. ProcessPro is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro is available with full source code and is sold and supported directly by ProcessPro. Visit ProcessPro's web site at www.ProcessProMFG.com or call 800/457-3548 for more information.
