Crown I Enterprises Select ProcessPro[®] Premier ERP

Industry standards, competitive advantage requires industry-specific ERP

St. Cloud, Minn., February 21, 2012 – Crown I Enterprises recently selected ProcessPro[®] Premier ERP software, providing the tools to comply with FDA regulations, client requirements, and real-time visibility for making smarter business decisions.

Crown I Enterprises is committed to making food safety and security a priority each and every day. Recent industry standards, including Safe Quality Food (SQF) which assures buyers and customers that food has been produced, processed and handled according to the highest standards, required them to evaluate their internal software system.

“ProcessPro was immediately suggested,” says Jay Gavigan, VP, IT Director at Crown I Enterprises. Jay heeded the advice given by Mario Gonzalez, Quality Assurance and Eric Ringel, Inventory & Packaging Manager. Both had used ProcessPro at a former food manufacturer employer. “ProcessPro could help us get to the level 2 SQF certification we desire,” says Gavigan. ProcessPro has a well-established reputation as the leading ERP for food manufacturers who must adhere to industry standards and government regulations.

“Real-time visibility was another critical component they were looking for,” says Tim Sands, ProcessPro Lead Business Development Representative. ProcessPro[®] Premier delivers visibility into what is occurring across all layers of an organization, in real-time. “This functionality provides the ability to make decisions quickly based on the most current information,” says Sands.

ProcessPro[®] Premier is the leading ERP solution among food and nutritional supplement manufacturers because of its ability to provide exceptional controls over complex, multiple-level formulas typical of highly regulated industries. Any company that must adhere to FDA, cGMP, Bioterrorism, SQF, and BRC regulations will be able to maintain compliance regularly as well as be prepared for a product recall.

For more information about ProcessPro[®] Premier and how it can meet your specific process manufacturing needs, visit www.ProcessProERP.com.

###

ProcessPro[®] Premier is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro[®] Premier seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro[®] Premier is sold and supported directly by ProcessPro. Visit ProcessPro's web site at www.ProcessProERP.com or call 800/457-3548 for more information.
