### Hampford Research, Inc. Partners with ProcessPro for ERP Solution

---

*Leading Company Gains Competitive Advantage with Implementation of ProcessPro<sup>®</sup> Premier*

St. Cloud, Minn., January 14, 2010 -- Hampford Research, Inc. recently purchased ProcessPro<sup>®</sup> Premier software to meet their ERP solution requirements. For the past 25 years, Hampford Research has offered hand-crafted, custom solutions for R&D, pilot, and full scale production of chemical products. They have earned the reputation as being one of the finest specialty chemical manufacturers in the United States.

“We are looking forward to leveraging the ProcessPro<sup>®</sup> ERP system to make us a more efficient, competitive organization,” says Kate Hampford Donahue, President of Hampford Research.

Hampford Research has the technical expertise, inspired thinking, and industry knowledge that makes them an ideal partner for companies with product development and production needs. With the implementation of ProcessPro<sup>®</sup> Premier, Hampford Research will be able to meet their customer demands with greater accuracy, management, and efficiency.

“We are looking forward to using a fully integrated system as opposed to the multiple database platform we are on currently,” says Angel Fekete, Manager of Finance for Hampford Research. “Of all the ERP systems we looked at, ProcessPro<sup>®</sup> Premier best fit the needs for us as a batch manufacturer.”

ProcessPro<sup>®</sup> Premier is a fully integrated, real time ERP that offers a complete system from beginning sales order entry through the manufacturing and accounting process. With R&D integration, companies are able to develop products without interrupting current production. All R&D items are automatically tracked in the system, and formulas protected with user security settings.

For more information about ProcessPro<sup>®</sup> Premier and how it can meet your specific process manufacturing needs, visit [www.ProcessProERP.com](http://www.ProcessProERP.com)

###

ProcessPro<sup>®</sup> Premier is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro<sup>®</sup> Premier seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro<sup>®</sup> Premier is available with full source code and is sold and supported directly by ProcessPro. Visit ProcessPro's web site at [www.ProcessProERP.com](http://www.ProcessProERP.com) or call 800/457-3548 for more information.
