Jeneil Biotech, Inc. Grows Its Business with ProcessPro[®] Premier ERP

St. Cloud, Minn., July 20, 2011 – Jeneil Biotech, Inc., an international leader in microbiology, selected ProcessPro[®] Premier ERP software for automating its manufacturing operations. Jeneil is the largest supplier of natural dairy flavors, Enzyme Modified Cheeses (EMC), butter and cream flavors in North America. Jeneil is also a leading supplier of soymilk powders, non-dairy beverage powders, and flavors to the soy industry, as well as other natural flavor chemicals.

“Jeneil needs a fully-integrated ERP solution that can manage everything from manufacturing through accounting in an effort to “streamline” their entire operation,” says Mat Jahnke, ProcessPro Business Development Representative. “An ERP system made for the process manufacturing industry is their most powerful option.”

Of the many reasons Jeneil selected ProcessPro[®] Premier, the software’s ability to track raw material and finished good lot numbers was one of the most important. Tracking lot numbers is required of all FDA regulated companies. With cradle-to-grave tracking capabilities, Jeneil will be prepared for a complete FDA audit or product recall.

Additionally, ProcessPro[®] Premier provides electronic signature options also required by the FDA under 21 CFR regulations. User logins require combined codes for user IDs and passwords; the user IDs and passwords are encrypted for added security.

“The decision makers at Jeneil were impressed with the software’s ease of use,” continues Jahnke. “They run a complex business and felt good that ProcessPro[®] Premier could manage operations without adding further complication.”

ProcessPro[®] Premier is a fully integrated, real time ERP that offers a complete system from beginning sales order entry through the manufacturing and accounting process. ProcessPro[®] software is the leading ERP solution among food manufacturers because of its FDA compliance features including security audit trails, electronic signatures, and validation services. Any company that must adhere to FDA and cGMP regulations will be able to maintain compliance regularly as well as be prepared for a product recall.

For more information about ProcessPro[®] Premier and how it can meet your specific process manufacturing needs, visit www.ProcessProERP.com.

###

ProcessPro[®] Premier is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro[®] Premier seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro[®] Premier is sold and supported directly by ProcessPro. Visit ProcessPro’s web site at www.ProcessProERP.com or call 800/457-3548 for more information.
