your ERP needs.

Sorting out the differences between manufacturing software packages can be mind boggling.

- What are the differences between process and discrete packages?
- Which one do I need?
- What are the consequences of purchasing the wrong one?

Purchasing the wrong ERP system will not only cause headaches and frustration, but often a significant loss of revenue.

Avoid the pitfalls of making the wrong decision!

Join us for a 30 minute webinar to learn the top 8 questions to ask when evaluating which ERP software is right for your business. [Register now.](#)
