### Marine Nutraceuticals Secures Business Growth with ProcessPro<sup>®</sup> Premier ERP

St. Cloud, Minn., November 30, 2010 – Marine Nutraceutical Corporation is a leading manufacturer of superior quality marine ingredients. They offer a full range of fish oils that are minimally processed, highly refined, and molecularly distilled. This progressive supplement company of Mount Bethel, PA, recently selected ProcessPro<sup>®</sup> Premier ERP as its business software solution.

“Marine Nutraceutical needed an advanced configurable reporting tool for year to year, customer, and product comparisons,” says Nick Quercetti, ProcessPro Regional Sales Manager. “The ProcessPro<sup>®</sup> Business Analytics application is easy to use, has customizable formatting abilities, and has unlimited reporting capabilities from any data set.”

As part of a fully integrated ERP system, the Business Analytics application is able to provide all data in real-time. Every report is accurate to the minute it is run. The Data Analyzer tool allows viewers to analyze data to help answer important business questions.

Many of the products manufactured at Marine Nutraceutical are specially formulated according to customer requests.

“The ProcessPro<sup>®</sup> Research and Development application provides a virtual sandbox allowing manufacturers to change formulations based upon product specifications from the customers without disrupting routine production lines,” says Quercetti. “The R&D application also gives them the ability to provide a uniform pricing structure.”

Inventory visibility and Material Requirements Planning are now inherent in a fully integrated system, in lieu of doing everything manually via spreadsheets. Marine Nutraceutical will benefit from saving time, reducing errors, and improving customer satisfaction with ProcessPro<sup>®</sup> Premier ERP.

ProcessPro<sup>®</sup> Premier is a fully integrated, real time ERP that offers a complete system from beginning sales order entry through the manufacturing and accounting process.

For more information about ProcessPro<sup>®</sup> Premier and how it can meet your specific process manufacturing needs, visit [www.ProcessProERP.com](http://www.ProcessProERP.com).

###

ProcessPro<sup>®</sup> Premier is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro<sup>®</sup> Premier seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro<sup>®</sup> Premier is available with full source code and is sold and supported directly by ProcessPro. Visit ProcessPro's web site at [www.ProcessProERP.com](http://www.ProcessProERP.com) or call 800/457-3548 for more information.
