Mr. Mudbug Secures Product Quality with ProcessPro[®] Premier ERP

St. Cloud, Minn., December 2, 2010 – Louisiana’s finest full service catering company, Mr. Mudbug, recently selected ProcessPro[®] Premier ERP software. Mr. Mudbug specializes in manufacturing the famous King Creole line of soups, sauces, and entrees used by many restaurants across the country. Mr. Mudbug, established in 1984, is committed to maintaining the highest level of customer satisfaction and exceptional food quality.

“Mr. Mudbug was looking for an ERP developer and implementation team with a solid background in understanding FDA regulations as well as a system that could match their quality control needs,” says Dan Erickson, ProcessPro Product Consultant. “ProcessPro is able to deliver both.”

ProcessPro[®] Premier ERP provides security audit trails and electronic signature options to help Mr. Mudbug maintain compliance with the FDA rule 21 CFR Part 11. The quality control application features provide the capability to tailor instructions for each formula and packaged product. It is also able to record and execute an unlimited number of test instructions.

Additionally, the expert ProcessPro Implementation Team follows a proven implementation plan that was developed for manufacturers that require software validation.

“Of equal importance to Mr. Mudbug was that the ERP software needed to be user-friendly and flexible,” says Erickson.

The open architecture within ProcessPro[®] Premier allows users to easily change forms and reports while maintaining maximum control over the accounting system. The complete flexibility keeps all options open as Mr. Mudbug evolves and grows over time.

ProcessPro[®] Premier is a fully integrated, real time ERP that offers a complete system from beginning sales order entry through the manufacturing and accounting process. Additionally, ProcessPro[®] Premier has been designed specifically with the regulated manufacturer in mind.

For more information about ProcessPro[®] Premier and how it can meet your specific process manufacturing needs, visit www.ProcessProERP.com.

###

ProcessPro[®] Premier is the leading mid-market ERP software solution for the process manufacturing industry.
