### **ProcessPro Attends Organic Trade Association Tradeshow**

---

St. Cloud, Minn., June 8, 2009 -- ProcessPro, developers of ProcessPro<sup>®</sup> Premier ERP software, will exhibit at the Organic Trade Association (OTA) Tradeshow in Chicago this month. The OTA Tradeshow coincides with the All Things Organic Conference.

"We're excited about meeting new prospects," comments JoeBlauert, President of ProcessPro. "But even more so, we're excited about the possibility of teaming up with organic manufacturing companies in helping them streamline their operations and monitor the stringent regulations that are necessary with organic manufacturing."

As a member of OTA, ProcessPro is able to stay abreast of industry changes.

"The organic industry is a fast changing market, and the OTA updates are constructive in keeping us updated on the latest regulations," says Shanon Odegaard, Quality Systems Manager of ProcessPro.

ProcessPro has many clients who manufacture and produce organic products. ProcessPro<sup>®</sup> Premier ERP software has been a critical tool for these organic manufacturers in upholding standards and regulations of this industry.

Utilizing ProcessPro<sup>®</sup> software Automated Warehouse System, manufacturers are able to maintain tight controls over their Batch Tickets as well as automate inventory transactions accurately and efficiently without ever compromising the organic food integrity by risking cross contamination with non-organic food.

Additionally, ProcessPro<sup>®</sup> software provides cradle-to-grave traceability. This gives manufacturers the record keeping trail they need to maintain organic certification through records audits and on-site inspections.

Premier 10 is a robust ERP system with full manufacturing and financial integration, offering a complete system from beginning sales order entry through the manufacturing and accounting process.

For more information about how ProcessPro<sup>®</sup> Premier ERP software has helped manufacturers in the organic market be more successful call 1-800-457-3548 or visit: <http://www.ProcessProERP.com>.

###

ProcessPro<sup>®</sup> Premier is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro<sup>®</sup> Premier seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro<sup>®</sup> Premier is available with full source code and is sold and supported directly by ProcessPro.
