### ProcessPro Announces Membership to Organic Trade Association

St. Cloud, Minn., April 7, 2008 -- ProcessPro, developers of ProcessPro® ERP software, has recently become members of the Organic Trade Association (OTA). With the rising number of organic producers that ProcessPro serves, membership to this association is a key strategy to staying abreast of all the latest policies and regulations of the organic market.

"Being a member of this association will strengthen our understanding of the organic industry's needs," says Rebecca Kempenich, Marketing Director, ProcessPro. "Increasing our knowledge benefits everyone: our clients, our employees, and our prospects."

There are many benefits to being members of the OTA. ProcessPro will receive timely and accurate organic industry news through OTA's twice monthly news publications. ProcessPro will also receive announcements on how new regulations and legislation will impact organic manufacturers and organic agriculture.

"ProcessPro continues to focus its software development efforts on meeting regulatory requirements. Doing so not only allows our clients to maintain compliance, but to develop high quality products for their customers," says Julie Donat, ProcessPro Product Manager.

Another benefit significant to ProcessPro, is the discount applied toward OTA's publications and events. This spring, ProcessPro will be attending OTA's biggest event of the year: All Things Organic Tradeshow. It's a powerful opportunity to network with other members of the association, and extend our product and services to manufacturers in need of an integrated ERP.

ProcessPro® software is the ERP solution many organic manufacturers have partnered with to help them either achieve or maintain organic certification, and to regulate their processes to line up with FDA regulations. With the software's sophisticated lot tracking capabilities, manufacturers are able to accurately trace raw materials in a "one-up, one-down" recall system. ProcessPro® software's advanced reporting features allow users to retrieve information about raw materials or finished goods within minutes. Lastly, Batch Tickets can be verified at any time to validate the organic status of a material, thus ensuring the integrity of the organic product.

For more information about ProcessPro® ERP software and its use for organic manufacturers, or to schedule a free demonstration, call 1-800-457-3548 or visit: <http://www.ProcessProMFG.com>.

###

ProcessPro® software is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro® software seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro® software is available with full source code and is sold and supported directly by ProcessPro. Visit ProcessPro's web site at [www.ProcessProMFG.com](http://www.ProcessProMFG.com) or call 800/457-3548 for more information.
