ProductAdvantage Connection provides networking, knowledgebase, and community among ProcessPro software users.

St. Cloud, Minn., January 25, 2007 - ProcessPro[®] software is proud to announce the debut of ProductAdvantage[™] Connection (PAC), an on-line user group forum exclusively for ProductAdvantage clients.

You asked and we delivered!

“This was the number one requested item at our recent client conference,” says Scott Fujan, VP of Sales and Marketing. “We are expecting this to be an excellent resource for users to network and learn from each other.”

Users can post questions and start discussions with both ProcessPro support staff and industry colleagues. Segmented by modules or topics, the individual forums found on PAC provide an organized resource library for ProcessPro users.

“The online user group is designed to be a positive place where users can post questions related to specific modules or topics and seek responses from their peers,” states Shanon Odegaard, PAC Administrator and Quality Systems Manager.

ProductAdvantage clients are now able to sign-up and access various PAC forums at <http://PAC.ProcessProMFG.com>. For more information, contact Scott Fujan via email at sdf@ProcessProMFG.com or Toll Free at 800/457-3548.

###

ProcessPro[®] software specializes in the implementation of ERP software solutions for the process/batch manufacturing industry. ProcessPro is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro is available with full source code and is sold and supported directly by ProcessPro. Visit ProcessPro's web site at www.ProcessProMFG.com or call 800/457-3548 for more information.
