### Quality Ingredients Corporation Live on *Premier 10.1!*

St. Cloud, Minn., October 7, 2010 -- Quality Ingredients Corporation successfully completed implementation of ProcessPro<sup>®</sup> *Premier* 10.18. Quality Ingredients started their partnership with ProcessPro, developers of ProcessPro<sup>®</sup> software, in November 2009. Quality Ingredients is now live at both production facilities located in Burnsville, MN and Marshfield, WI.

The newest version of ProcessPro<sup>®</sup> *Premier* provides exceptionally accurate inventory controls for Quality Ingredients. This functionality was vitally important as Quality Ingredients manages a broad variety of dry ingredient systems. In fact, inventory was initially reconciled to a difference of less than \$2.00 between their legacy system and newly implemented *Premier 10.1*.

“With this degree of accuracy, our clients can be assured that reporting and data analysis will have the highest degree of reliability. This, in turn, sets clients up for future success as they make fully informed business decisions,” says Molly Caron, Senior VP of Operations, ProcessPro.

One of the most significant factors contributing to the successful implementation of this software was the team effort between the staff at Quality Ingredients and the implementation specialists at ProcessPro. Quality Ingredients Corporation selected a full time client project manager to manage resources, and to be the first to receive supplemental training and practice during implementation. Then, following the proven implementation process developed by ProcessPro, each step was successfully executed and completed.

“Because an ERP model is designed to integrate major business functions into one system, the transition can be complex,” explains Jeff Hauser, ProcessPro Implementation Specialist. “With each party following the implementation plan, Quality Ingredients was up and running smoothly and efficiently within the designated time frame.”

ProcessPro<sup>®</sup> *Premier* ERP is a fully integrated, real time ERP that offers a complete system from beginning sales order entry through the manufacturing and accounting process. For more information about ProcessPro<sup>®</sup> *Premier* and how it can meet your specific process manufacturing requirements, visit [www.ProcessProERP.com](http://www.ProcessProERP.com).

###

ProcessPro<sup>®</sup> *Premier* is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro<sup>®</sup> *Premier* seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro<sup>®</sup> *Premier* is available with full source code and is sold and supported directly by ProcessPro. Visit ProcessPro's web site at [www.ProcessProERP.com](http://www.ProcessProERP.com) or call 800/457-3548 for more information.
