Quality Ingredients Corporation Selects ProcessPro[®] ERP

St. Cloud, Minn., January 4, 2010 -- Quality Ingredients Corporation, headquartered in Burnsville, Minnesota recently purchased ProcessPro[®] Premier software to meet their ERP solution requirements. Quality Ingredients Corporation combines food science and product development expertise to offer dry food ingredient products.

The mission at Quality Ingredients is to provide its customers with the best quality products to meet their business needs. The team at Quality Ingredients utilizes the most advanced technology to help their clients grow their businesses by providing products that are healthier, better tasting, or easier to use based on customer needs.

“I recognized the unique need Quality Ingredients had for quality control of their products, and knew that ProcessPro[®] software was a perfect fit,” says Amanda Mackadanz, ProcessPro Lead Product Consultant. “Because of the diversity in the products they offer and the many customized formulas wanted by their clients, they need to be able to perform customer-specific testing - a function of ProcessPro[®] ERP.”

Like all food manufacturers, Quality Ingredients is regulated by the Food and Drug Administration (FDA) and must maintain lot traceability at all times. The ProcessPro[®] Bill of Material Product Tracking Log provides a complete audit trail for formulas and products.

“We believe ProcessPro[®] software will give us the integrated system we need to help us run our business. A major factor in our decision to purchase ProcessPro[®] software is that ProcessPro is a well-established industry-specific package. We preferred this to some of the other packages that try to be all things to all people,” says Bruce Boyea, CFO, Quality Ingredients Corporation.

For more information about ProcessPro[®] Premier and how it can meet your specific process manufacturing needs, visit www.ProcessProERP.com

###

ProcessPro[®] Premier is the leading mid-market ERP software solution for the process manufacturing industry.
