### Rimports Selects ProcessPro<sup>®</sup> Premier ERP Software

St. Cloud, Minn., March 2, 2011 – Rimports, manufacturers of ScentSationals<sup>®</sup> wickless candles, recently selected ProcessPro<sup>®</sup> Premier as its enterprise-wide software system. Located in Utah, Rimports provides scented wax and warmers to homes across the country. ScentSationals<sup>®</sup> features hundreds of fragrances to choose from including fruity, floral, holiday, and many more scented waxes.

Rimports chose ProcessPro<sup>®</sup> Premier because it is a complete system providing automation of their manufacturing process, as well as reliability within a system specifically for regulated process manufacturers.

“Rimports was experiencing problems ranging from insufficient inventory control to a lack of integration with website orders,” says Aaron Gindele, ProcessPro Business Development Representative. “ProcessPro was able to provide a solution to their most pressing problems and business inefficiencies.

Rimports needed improvements in both inventory control and production scheduling through a solution that could simplify the process of planning and forecasting. They also needed this information to tie into their financials, with an easy way to generate reports. Finally, Rimports was looking for a simple way for their ownership to have anytime-access to all this data: inventory, production, financials, and more.

ProcessPro<sup>®</sup> Premier software is a perfect fit for manufacturers in the flavor and fragrance industry, specifically addressing unique industry requirements. Additionally, ProcessPro<sup>®</sup> Premier gives users the ability to easily create and track formulas for samples, and allows for packaging of the same formula in random containers.

ProcessPro<sup>®</sup> Premier is a fully integrated, real time ERP that offers a complete system from beginning sales order entry through the manufacturing and accounting process.

For more information about ProcessPro<sup>®</sup> Premier and how it can meet your specific process manufacturing needs, visit [www.ProcessProERP.com](http://www.ProcessProERP.com).

###

ProcessPro<sup>®</sup> Premier is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro<sup>®</sup> Premier seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro<sup>®</sup> Premier is available with full source code and is sold and supported directly by ProcessPro. Visit ProcessPro's web site at [www.ProcessProERP.com](http://www.ProcessProERP.com) or call 800/457-3548 for more information.
