### **Royal Food Products, LLC Selects ProcessPro<sup>®</sup> Software as Its ERP Solution**

St. Cloud, Minn., April 10, 2008 -- Royal Food Products, LLC of Indianapolis, Indiana recently purchased ProcessPro<sup>®</sup> software as its ERP solution for complete business integration. Established in 1904, this century old company began as the Mutual Milk Company, delivering quality dairy products to local customers.

Royal Food Products is committed to maintaining its 100 year traditions in food quality, while at the same time growing with the food industry through product line expansion. Although this company currently manufactures primarily dressings and sauces, it maintains its dairy facility status, which requires a higher grade of manufacturing equipment and some of the toughest quality control standards in the industry.

"ProcessPro<sup>®</sup> software's quality control application features some of the greatest strengths of our ERP package," says Kelly Schepers, National Consultant for ProcessPro. "With the stringent guidelines put forth by the FDA, and with Royal Food's commitment to maintaining their dairy facility status, our software was the perfect solution for them."

ProcessPro<sup>®</sup> software has the most advanced quality control features of any ERP solution in the mid-size manufacturing market. Not only do the quality control tools of this software provide tailored instructions for each formula and packaged product, but the intuitive entry display makes recording QC results uncomplicated and straight forward. Also, if the QC test results are out of range, the user is warned.

"In addition to the outstanding quality control features of ProcessPro<sup>®</sup> software, we chose this solution over others because the company consultants showed us very specifically how the software would work for us," says Joe McCarthy, CFO of Royal Foods. "Royal Foods chose ProcessPro<sup>®</sup> software because of its robust features. With a software that can 'do it all' without any customization helped us save a substantial amount of money," says McCarthy.

ProcessPro<sup>®</sup> software is the leading ERP solution among food manufacturers because of its FDA compliance features including security audit trails, electronic signatures, and validation services. ProcessPro<sup>®</sup> software seamlessly integrates Order Entry, Inventory Control, Purchase Orders, Accounts Payable, Accounts Receivable, General Ledger, and more!

For more information about ProcessPro<sup>®</sup> ERP software and the manufacturers who use ProcessPro<sup>®</sup> software, or to schedule a free demonstration, call 1-800-457-3548 or visit: <http://www.ProcessProMFG.com>.

###

ProcessPro<sup>®</sup> software is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro<sup>®</sup> software seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro<sup>®</sup> software is available with full source code and is sold and supported directly by ProcessPro. Visit ProcessPro's web site at [www.ProcessProMFG.com](http://www.ProcessProMFG.com) or call 800/457-3548 for more information.
