Royal Labs Natural Cosmetics, Inc. Opts for First-Rate ERP

St. Cloud, Minn., January 7, 2008 -- Royal Labs Natural Cosmetics, Inc. of Charleston, South Carolina recently purchased ProcessPro[®] ERP software as its solution for complete manufacturing integration. This FDA registered facility is a custom formulator and contract manufacturer of truly natural cosmetics for a wide variety of clients both large and small.

Royal Labs maintains an exceptional commitment to quality that extends through every phase of product development, manufacturing, and packaging. They adhere to numerous testing and procedural protocols including: Total GMP Compliance, raw material analysis, protocols imposed by Federal and State agencies, and many more.

"We chose ProcessPro over other software packages because we felt that this ERP solution, based on the product demonstration, was the most capable in addressing our inventory needs as a contract cosmetic manufacturer," says Paul Lieber, CEO and Founder of Royal Labs.

ProcessPro's Inventory Control application automatically tracks inventory balances, serial numbers, lots, and product line information, all of which are critical components in the manufacturing of cosmetic skin care products. Furthermore, all balances are updated in real-time for up-to-the-minute data accuracy.

"Another major concern of the leaders at Royal Labs was how well the software vendor understood the cosmetic industry," says Jim Negen, ProcessPro National Sales Consultant. "Their concerns were put to rest when they learned of the vast number of other cosmetic manufacturers that use and are satisfied with our product."

ProcessPro is a leader among cosmetic manufacturers because of its FDA compliance features including security audit trails, electronic signatures, and validation services.

For more information about ProcessPro ERP software and the manufacturers who use ProcessPro, or to schedule a free demonstration, call 1-800-457-3548 or visit: <http://www.ProcessProMFG.com>.

###

ProcessPro[®] is the leading mid-market ERP software solution for the process manufacturing industry.
