### **Turri's Italian Foods Chooses ProcessPro<sup>®</sup> Premier ERP Solution**

St. Cloud, Minn., November 9, 2009 -- Turri's Italian Foods of Chesterfield, Michigan chose ProcessPro<sup>®</sup> Premier to meet its growing business demands. Anthony and Angeline Turri founded Turri's Italian Foods in 1949. The company started out making pasta products for local restaurants and grocery stores. Sixty years later, Turri's is owned and operated by the fourth generation of Turri family members, and they provide top quality Italian dinners to national restaurant chains, industrial customers, custom manufacturers, and food service distributors.

Turri's offers and prides themselves in providing a full line of high quality frozen Italian specialties. Turri's Italian Foods has been challenged in meeting the demands of a growing business while at the same time maintaining family traditions and values in their food production.

"We've been doing things the 'hard way'," says Mary (Turri) Derlicki, Secretary/Treasurer of Turri's Italian Foods. "In our two year search for the right software, we found that ProcessPro<sup>®</sup> Premier was the only ERP package that could match the demands of a growing business without compromising our family history of quality foods."

ProcessPro<sup>®</sup> Premier is a complete ERP solution. It is a perfect fit for Turri's Italian Foods because of its enterprise-wide functionality. ProcessPro<sup>®</sup> Premier offers complete integration with accounting, quality control, lot tracking, label printing, and more. Rather than running two separate programs to manage Turri's operations, everything is integrated and updated in real time, including formulas and recipes. Turri's formulas and recipes are the backbone of the company, and with the click of a button, updates can be sent throughout the entire system within seconds.

"While we were certainly attracted to the complete integration of the ERP package, we were especially attracted to the flexibility," says John Turri, Vice President Plant Operations at Turri's Italian Foods. "We run a myriad of custom reports, and ProcessPro<sup>®</sup> Premier exceeds our capability requirements."

ProcessPro<sup>®</sup> Premier is the leading ERP solution among food and beverage manufacturers. ProcessPro<sup>®</sup> Premier seamlessly integrates Order Entry, Inventory Control, Purchase Orders, Accounts Payable, Accounts Receivable, General Ledger, and more!

For more information about ProcessPro and the manufacturers who use ProcessPro<sup>®</sup> Premier ERP software, or to schedule a free no-obligation demonstration, call 1-800-457-3548 or visit [www.ProcessProERP.com](http://www.ProcessProERP.com)

###

ProcessPro<sup>®</sup> Premier is the leading mid-market ERP software solution for the process manufacturing industry. Designed specifically for manufacturers that combine batches of mixtures, ProcessPro<sup>®</sup> Premier seamlessly integrates all aspects of plant operation, from beginning order entry through manufacturing, packaging, shipping and accounting. ProcessPro<sup>®</sup> Premier is available with full source code, and is sold and supported directly by ProcessPro.
