Fertilizer Company “Grows” with ProcessPro

St. Cloud, Minn., January 12, 2007 -- Voluntary Purchasing Groups, Inc., manufacturer of ferti-lome®, Hi-Yield®, Natural Guard®, and American Brand® fertilizers for more than 40 years, has selected ProcessPro® software as its ERP solution to streamline business operations. ProcessPro software is a robust ERP system with full manufacturing and financial integration, offering a complete system from beginning sales order entry through the manufacturing and accounting process.

Voluntary Purchasing Groups, located in Bonham, Texas, needed a software that linked accounting with manufacturing. After utilizing an online software search service and analyzing the results of that search, VPG chose ProcessPro over other ERP systems because of its ability to integrate, but also because ProcessPro is fully supported by its vendor.

“The software covered all aspects of our business,” declared Judy Dossey, VPG Accounting Manager. “We really were won over on the fact that it is a fully integrated system and supported directly by the developer.”

“Not only is ProcessPro a great ERP fit for VPG and other fertilizer manufacturers, but it is also a fit for companies that want the security that the developer of the software will support its product,” Tim Sands, ProcessPro National Sales Consultant states. “Many companies feel that having a direct relationship with the developers is a major advantage, whether its during the selection process, implementation, training or support.”

ProcessPro will provide VPG with standard Quality Control, Material Safety Data Sheets (MSDS), automatic updated Inventory Control in real time, advanced General Ledger and financial reporting, and much more.

For more information about ProcessPro software, or to schedule a free demonstration, call 1-800-457-3548 or visit: <http://www.ProcessProMFG.com>
