

Advanced Analytics

Analyze, Decide and Plan Faster than ever
Analytics designed for process manufacturers with powerful,
easy-to-use, pre-packaged self-service solutions

Advanced Analytics Package

Featuring a robust data reporting warehouse, Advanced Analytics enables interactive visualization, reporting and analysis of your data from any device (mobile or PC) anywhere in your business. Graphing, sorting and drilling into your critical business information in any way, combined with robust pre-built reports, metrics and KPIs provides an essential tool for analyzing your business.

Additional Business Tools

Big Data

Consolidate, visualize and analyze data from various sources, including suppliers and vendors, into a single data warehouse. Users can leverage interactive drag-and-drop functionality and point and click drill down capabilities in intuitive displays that highlight trends, patterns and relationships. Data manipulation tools and automatic data cleansing help users create the best possible data set.

Forecasting / Predictive Analytics

With seamless integration to ProcessPro data, easily anticipate your needs and manage your risk with insight into where your business is headed. Compare possible outcomes of events with the ability to perform what-if analysis and foresee challenges or potential disruptions before they occur.
