

FIXED ASSETS

ProcessPro Global's Fixed Assets solution provides your company the necessary tools to forecast and analyze tax and cash-flow implications of assets before you acquire them and easily track valuation and depreciation once you have made an investment. This flexible application will assist your company in making wise buying vs. leasing decisions and help manage capital for maximum ROI. Fixed Assets includes a full range of valuable financial and management reports to oversee investments and meet tax reporting requirements.

Fixed Assets' dynamic forecasting tools help evaluate leases, amortize loans and experiment with depreciation strategies before you make capital commitments. Compare and analyze variable depreciation options in four unique depreciation books within the application. The Fixed Assets functionality allows you to easily retire assets at any time, track the difference between estimated depreciable and actual service life and calculate the cost or proceeds from the retirement of an asset.

Stay up-to-date with tax law changes using IRS-supplied depreciation tables, as well as MACRS, ACRS, straight line, sum-of-the-year digits and declining balance recovery methods.

Application Benefits

- Save money by using the Lease vs. Buy Analysis and Trial Depreciation functions to arrive at the most efficient depreciation strategy.
- Easily review asset identification, acquisition, valuation, depreciation information and disposal information with the Fixed Assets list and the Retired Assets list.
- Calculate depreciation for a combination of books including book, federal tax, alternative minimum tax and other (such as state or local).
- Eliminate manual journal entries; the *Global* General Ledger interface records accumulated depreciation expense entries automatically when you post.
- Manipulate the system to conform to your tax assessment and reporting needs with user-definable tax districts.
- Group related assets for reporting purposes or link additions and adjustments to original assets by using multiple-part asset IDs.
- Modify the system to accommodate to the way your business is organized with user-definable location fields.
- Track actual and scheduled service maintenance dates with a description of work performed for each asset.
